

XERISCAPING

VS

LAWNS

By: Zoey Riser

What is Xeriscaping?

- Xeriscaping is when using plant material and rocks instead of a lawn.
- Xeriscaping is usually used in desert areas.

Xeriscaping is good

Xeriscaping is a good idea because:

- Less money spent on water
- Less care taking time
- Appreciation of native plant material

Xeriscaping saves water

- Xeriscaping saves water and money because it is plant and rock and it does not require a lot of water.
- Water costs a lot of money.

Xeriscaping helps save money

-Xeriscaping is proved to be more cost effective than turf lawns even if only a small area of yard is xeriscaped

Lawns look nicer than xeriscaped yards

-People say lawns look nicer and more taken care of than xeriscaped yards

Xeriscaping is cool

- Xeriscaping helps with saving on water and money
- There is less care taking time spent on it
- It shows appreciation to nature and plants

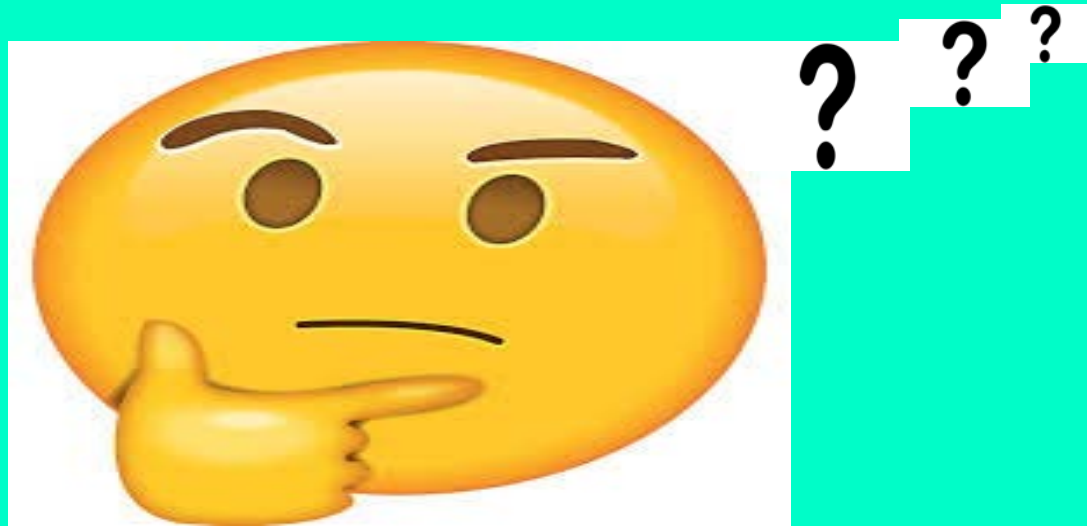

Xeriscaping is better

Xeriscaping can help save the planet
